WELCOME MESSAGE

The Eurasian Federation of Oncology is pleased to inform that the Eurasian Women's Cancer Forum will be held in the City of Chennai, Which is the capital of the Southern Indian state of Tamilnadu, on 21–22 February 2015.

Continuing the EAFO tradition, the participants have the unique opportunity to enjoy highly subsidized competitive registration rates accessible to anyone, irrespective of country of origin. Like other EAFO forums, we expect faculty and participants from different countries to take part in this event.

The organizing committee is doing everything possible for the effective interaction between speakers and participants.

We hope that your participation will have a positive impact on clinical practice in the interests of patients and you will enjoy the stay in this great city.

Tamil Nadu Government Multi Super Speciality Hospital

Chennai, Tamil Nadu, India

Government Estate on Anna Salai, abutting the MRTS elevated railway line. The nearest railway station is Chintadripet.

The complex is designed by German-based architect company GMP, a united venture of Meinhard von Gerkan and Volkwin Marg based at Berlin. The construction of the new assembly was entrusted to East Coast Constructions and Industries Limited.

With its highly visible dome measuring 30 m tall and 45 m in diameter, the complex has four circular courtyards, and the design echoes the structural features of Dravidian temple complexes in south India. The dome is modelled on the Draupadi Ratha at Mamallapuram and resembles the top of a Tamil temple car. The complex has two blocks — Block A and Block B. The seven-storey Block A houses the hospital. A baffle wall is constructed in three layers and is being erected in a circular structure at a height of 100 ft.

The facilities include 14 dedicated operation theatres, laboratories, CT scan and MRI scans. The 400-bed hospital has a 500-seater conference hall. It has a hospital management information system with a storage capacity of 60 terabytes, specifically to store patient information, including investigations and the treatment given. Other facilities includes two cath labs with diagnostic imaging equipment separately for the heart and brain, an emergency room near the entrance to the building, Wifi connectivity, mobile phone signal boosters, battery cars on every floor and in the compound and 150 surveillance cameras. The intensive care units have seventy electro-hydraulically operated imported beds with digital touch screens. Drinking water is dispensed by means of 10 water dispensers on each floor, which are sourced from the reverse osmosis plant with a capacity of 6,000 liters of water per hour, operated by remote monitoring software.

Tamil Nadu Government Multi-Super-Speciality Hospital is a 400-bed government-owned super-speciality hospital in Chennai, India. It is located at the Omandurar Government Estate on Anna Salai and was opened in February 2014 as a referral hospital, similar to the All India Institute of Medical Sciences (AIIMS) in New Delhi, built at a cost of 1,431.4 million.

The six-storey hospital was inaugurated on 21 February 2014, with four medical departments, namely, cardiology, neurology, medical oncology and nephrology and five surgical departments, namely, cardiothoracic, neuro, hand and reconstructive micro surgery, vascular and surgical oncology, in addition to a lifestyle clinic for yoga and naturopathy. The hospital is located at the western end of the Omandurar
